

Cyrus Hamlin

Cambridge, MA 02138 ◦ chamlin@college.harvard.edu ◦ (906) 370-0146

EDUCATION

Harvard Kenneth C. Griffin Graduate School of Arts and Sciences

Cambridge, MA

A.M. Statistics, concurrent A.B./A.M. program

Expected May 2027

Relevant Coursework:

- *Graduate Probability I, Graduate Time Series, Graduate Linear and Generalized Linear Models, Introduction to Stochastic Processes*

Harvard College

Cambridge, MA

A.B. Mathematics, GPA: 3.88/4.00

Expected May 2027

Relevant Coursework:

- Math 55A/B: *Algebra, Group Theory, Real and Complex Analysis, Introduction to Data Science, Intro to Statistical Inference, Data Science of Networks, Probability and Random Processes with Economic Applications*

TECHNICAL SKILLS

- **Programming Languages:** *Python, R, C, SQL, Mathematica, L^AT_EX*
- **Python Libraries:** *PyTorch, NumPy, Pandas, scikit-learn, matplotlib, LightGBM, BeautifulSoup, Scrapy*
- **Skills:** *Machine learning, feature engineering & data wrangling, web scraping & APIs, document preparation (L^AT_EX)*

EXPERIENCE

Systematic Quant Trading Intern | IMC Trading

June 2026 – Present

- Helped develop a systematic trading bot that placed 5th out of 32 intern teams in simulated exchange rounds
- Built market data enrichment and analysis tools, along with a live GUI to monitor positions and trading behavior
- Developed a predictive model to identify market states and designed a systematic strategy to act on those predictions

Teaching Fellow & Course Assistant (Stat 111, Math 55) | Harvard University

Aug. 2024 – May 2026

- Lead sections, review sessions, and office hours for Stat 111 and Math 55
- Teach statistical inference, probability models, proof-based algebra, and analysis to 50+ students
- Grade problem sets and exams, providing clear feedback on quantitative reasoning and mathematical exposition

Machine Learning Research Assistant | Harvard University

June 2025 – August 2025

- Built downstream prediction models to test whether learned embeddings improved performance on geographic health prediction tasks
- Implemented and evaluated a graph neural network benchmark for geographic prediction tasks

PROJECTS

Equity Backtesting Framework

Aug. 2025

- Built day-by-day Python equity backtester using cleaned Alpha Vantage data to simulate positions and PnL over historical periods
- Converted model forecasts into trading signals and compared resulting PnL curves across strategies

Drug-Drug Interaction Prediction on Graphs

May 2026

- Integrated drug-gene information into a drug-drug interaction graph for link prediction
- Compared one-hot covariates against a knowledge-graph representation for incorporating drug-gene covariates
- Injected noise to test model robustness and identify which covariate representations remained most stable

LEADERSHIP AND ACTIVITIES

Harvard Varsity Nordic Ski Team | Member & Statistical Consultant

Dec. 2023 – Present

- Balance 20–25 hrs/week of Division I training with academic excellence
- Prepared a statistical report analyzing NCAA qualification rules and shared findings with the conference rule committee

Harvard First-Year Outdoor Program (FOP) | Trip Leader

Feb. 2025 – Present

- Co-lead a 10-student backpacking trip as part of Harvard's pre-orientation programs
- Facilitate group discussions and manage risk in dynamic outdoor environments

INTERESTS

Strategy board and card games (Euchre, Hearts, Diplomacy—top 2% on popular website), endurance athletics, fantasy cross-country skiing (top 50 worldwide)
